Projects

Once Upon An Adventure
onceuponanadventure.herokuapp.com | github.com/AnnaxGrace/once-upon-an-adventure
This application has a polished UI that allows the user to interact through a character they create and control. It combines a collection of educational mini games with an RPG that allows users to create a story that reflects their actions in the game.
Key Role(s): Animation of sprites, music, and sound effects
Technologies: Mongo, Express, React, NodeJs, React Redux, HTML5, Howler

Story Time | github.com/eh4git/StoryTime | fathomless-waters-70908.herokuapp.com
Helps parents to create one of a kind stories for their children by integrating information for a child into stories. Users create a password secured account and, through CRUD operations, are able to add, save, and edit a child's information that is tied to their account in the database.
Key Role(s): HTML and JavaScript
Technologies: Mongo, Express, NodeJs, JavaScript, jQuery

YouMDb
github.com/abazrafshan/YouMDb-Movie-App | abazrafshan.github.io/YouMDb-Movie-App
In this project several APIs are utilized to compile movie data into a centralized location that is easy to access for users. Users can save a list of movies which utilizes local storage for data persistence. The application imbeds movie trailers through the use of an iframe element.
Key Role(s): Bootstrap HTML layout
Technologies: Ajax, Express, HTML, CSS, JavaScript, jQuery
